1. The indicated allowability of claim 5 is withdrawn in view of the newly discovered reference(s) to Favret. Rejections based on the newly cited reference(s) follow.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, 7, 13 and 22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Favret (U. S. Pat. No. 6,705,330).

Re claim 1 for example, note that Favret discloses a dishwasher comprising:

a washing chamber;

top and bottom nozzles injecting water in the washing chamber (see col. 1, lines 18-47);

a sump (11) provided under the washing chamber to store the water;

a pump (3) pumping the water stored in the sump;

a supply pipe (63, 61) adjacent to one side of the pump wherein the water pumped by the pump flows in the supply pipe;

upper and lower pipes leading the water to the top and bottom nozzles, respectively; and

a valve assembly (52) connecting the supply pipe to the upper and lower pipes to selectively

open/close the upper or lower pipe using a pressure of the pumped water, wherein the valve assembly comprises a first guide portion (2) and a second guide portion wherein a rib (unnumbered, see fig, 2) is formed on a circumference of one of the first and second guide portion and a groove is formed on a circumference of the other of the first and second guide portions and wherein the rib is received in the groove to couple the first and second guide portions. Re claim 22, Favret discloses the wash chamber, pump, top and bottom nozzles, valve for selective supply and a passage forming a horizontally circuit, the pump to a first outlet to one of the top and bottom nozzles and ball moving along the passage.

3. Claims 17-21 are allowed.
4. Claims 8-12, 14-16 and 23-27 stand objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.
